

Installing Microsoft Zune 80GB Case

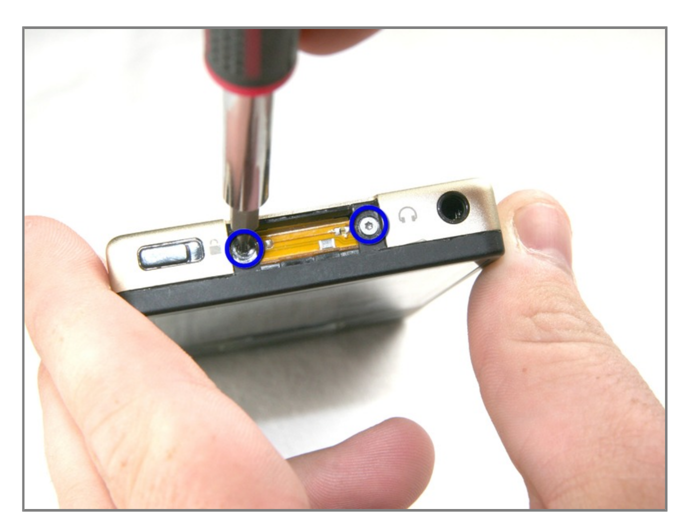

Tools used in this guide

- Metal Spudger
- Plastic Opening Tools
- T4 Torx Screwdriver

Step 1 - Case

- Use a metal spudger or plastic iPod opening tool to remove the small silver plastic cap on top of the device.

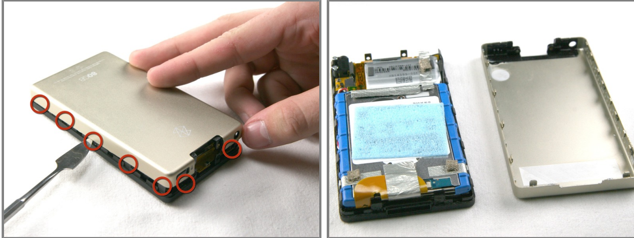

Step 2

- There are two T4 screws under the cap. Remove both with a T4 screwdriver.
- Be careful removing the screws; the screw heads can break very easily.

Step 3

- Using a metal spudger or iPod opening tool, remove the aluminum backing starting from the top. There are 5 clips on each side and two on the bottom.
- Be careful not to press the tools in too far; there are exposed cables right inside the edge of the device.
